EXPERIENCE

Kinaxis

Algorithms Developer

Sept. 2020 - Dec. 2020

- Future C++ backend developer on Supply Chain Management algorithms

Web Application Developer

Jan. 2020 - May 2020

- Currently a finalist for University of Waterloo Co-op Student of the Year
- Built 30+ reusable and responsive React components, leveraging Redux
- Practiced test-driven development to unit test components utilizing Jest, Jasmine and TestCafe, improving test coverage to over 97%
- Took initiative to establish help resources and tutorials for new employees
- Designed and implemented cutting-edge critical software for BETA launch of front-line customer product
- Routed data using 10+ RESTful API endpoints from C# server

Agriculture and Agri-Food Canada

Knowledge Graph Developer

April 2019 - Aug. 2019

- Created Python scripts and SPARQL queries to clean and organize over 20,000 botanical species' data into practical formats
- Created, implemented and stored knowledge graphs in a database on an AWS Metaphactory platform, facilitating user interactivity
- Built interactive visualizations using R and D3.js, enabling botanists to develop new insights and understandings of plant species
- Used Machine Learning and Data Mining to identify new correlations

PROJECTS

C++ Compiler

University of Waterloo | Top Grade, over 500 students May-Aug. 2020

- Incorporated C++ and MIPS to create a complete end-to-end compiler
- Created an Assembler, a Scanner, a Context Sensitive Analyzer and a Code Generator for the C++ language
- Optimized compiler to be in the top 1% of the most efficient submissions

trEcho

uOttawaHacks³ | Top 20, over 400 participants

Feb. 2020

- Leveraged Google Map API and AWS Lambda for Amazon Echo
- Employed algorithm on a Flask app to cache package's location, drastically reducing stress of over 30 million daily requests on the delivery system

Bit by Bit

Hacking Health Ottawa | 1st Place, over 100 participants June 2019

- Won 10,000\$ of support from the Algonquin College Centre for Innovation
- Collaborated to design an app to help recovering patients track their fitness
- Used HTML, CSS, React and Node.js, and a Fitbit API to fetch the data

Optimo Vision Analyzer

StarterHacks | 1st Place, over 500 participants

Jan. 2019

- Implemented voice recognition software using Web Speech API in addition to HTML, JavaScript, and CSS to allow a website to process and respond to a user's input, as well as dynamically adjust to varying screen-sizes

SKILLS

Programming Languages

C++

Python

React & Redux

Typescript

C

JavaScript

SPARQL

Java

Scheme (Racket)

Tools and Technologies

Git

Jest & Jasmine

Bash

Unix/Linux

Windows

AWS

MIPS

HTML

CSS

Shiny

EDUCATION

Candidate for Bachelor of Honours
Computer Science

University of Waterloo

📅 2018 - 2022

- President's Scholarship of Distinction (97.3% entrance average)
- GPA: 3.82/4.0

RELEVANT COURSES

- Object-Oriented Software Development
- Data Structures and Data Management
- Foundations of Sequential Programs
- Computer Organization and Design

LANGUAGES

English
French
Spanish

HOBBIES & EXTRACURRICULARS

- Varsity Quidditch Captain
- Acapella
- Strategy games aficionado
- Math Society Office Manager
